Brinkerhoff Environmental Services, Inc. consistently provides high quality environmental consulting services, completed within budget and on time.

The firm's team prepares environmental impact statements, site assessments, field investigations, hazardous waste screening, confined space permitting, development of remedial action workplans, and provides safe, reliable service to transportation agencies. The firm manages soil and groundwater investigations, remediation, environmental permitting, regulatory compliance, underground storage tank closures, lead-based paint assessments, and comprehensive asbestos-containing material (ACM) management plans. Brinkerhoff's professional staff is certified by the New Jersey Department of Environmental Protection, the State of New Jersey Department of Community Affairs, and maintains OSHA certifications. Among the services Brinkerhoff offers:

- Environmental Impact Statements and E.O. 215 Documents.
- Site Investigation/Hazardous Waste Screening performed as per the New Jersey Department of Environmental Protection Technical Requirements for Site Remediation (N.J.A.C. 7:26E).

- Asbestos assessments including ACM identification, hazard assessment, cost estimates and associated documentation, and operation and maintenance (O&M) Programs.
- Lead-based paint inspections including assessment of possible pathways, an inventory of painted building components, selection of painted surfaces to be tested, classification of results, and generation of inspection and summary reports.
- Site Remediation services ranging from evaluation of regulatory compliance to remediation of soil and groundwater. Underground storage tanks may require registration and application for closure approvals and regulatory compliance with NJDEP and OSHA.

Call to discuss how Brinkerhoff's staff can assist you.
