**Brinkerhoff Environmental Services, Inc.** (*Brinkerhoff*)

professionals have provided wetland consulting services to engineering companies, land developers, realtors, attorneys, and regulatory agencies since 1989. *Brinkerhoff* has expertise and innovative capabilities to complete projects within local, state, and federal regulations.

**Wetland Delineation**

*Brinkerhoff* staff has experience delineating wetlands according to the three-parameter approach outlined in the 1989 Federal Manual for Delineating Jurisdictional Wetlands. The firm has an in-house library of wetland vegetation.

**Letters of Interpretation and Jurisdictional Determinations**

Verification of a wetland delineation requires the submission of an application form, a delineation report, survey, topography, photographs, and supporting information. A review of the application results in an approval letter from the oversight regulatory agency. *Brinkerhoff* makes presence/absence determinations based on field reconnaissance, and also provides recommendations on the resource value of wetland areas.

**State and Federal Wetland Permitting**

*Brinkerhoff* obtains statewide general permits, transition area waivers, nationwide general permits, individual wetland permits, Army Corps of Engineers Section 404 and Section 10 permits, and Section 401 water quality certifications. For land use planning, *Brinkerhoff* professionals make recommendations to minimize environmental impacts and reduce permitting requirements.

**Wetland Mitigation and Monitoring**

Wetland mitigation is the creation, enhancement, or restoration of wetland areas to replace impacted wetlands. *Brinkerhoff* professionals can identify options to provide wetland mitigation. Many regulatory agencies require the implementation of a monitoring program to demonstrate success of a wetland mitigation project. *Brinkerhoff* develops wetland monitoring programs and performs inspections for success of the mitigation project.

Please call 732-223-2225 to discuss how Brinkerhoff's staff can assist you.
